## Summary

I am a tech enthusiast specialising in Flutter, React.js, and SpringBoot for web and mobile app development. My priority is to creating customized applications with micro services to deliver high-quality services and outcomes for my company.

## Skills

### Frameworks

- FLUTTER SDK
- ANDRIOD/KOTLIN
- NEXT.JS
- REACT.JS
- SPRINGBOOT/J2EE

### Familiarity Programming Languages

- DART
- C/C++
- JAVA
- NODE.JS
- PYTHON/GO LANG

### Databases/Cloud Services/CMS/Other Technologies

- FIREBASE
- MONGODB
- BASIC SQL/POSTGRESQL
- STRIPE
- RENDER
- VARCEL
- VERSION CONTROL/GIT
- UI/UX DESIGN
- BLOC/GET PATTERN
- MVC/MVVM
- API

## Experience

### **Tekzee Technologies pvt. ltd. | Indore**

Sr. Application Developer

11/2022 - present

- As a Application developer at Tekzee Technologies, I am working in remarkable range of projects, such as “**OnDoor Concept**” which is a high range of userbase ([link](#)). This app completely made on Native Android and java.
- “**MyProfit - Applications**” (User, employee, and vendor) created on flutter framework for android and IOs user([link](#)). Collaborating with team members and integrating various APIs, including third-party payment APIs, has significantly enhanced my development abilities. Additionally, I comprehend that designing an appropriate folder structure is critical for optimising application performance and ensuring ease of maintenance.

### **Wipro | Mumbai**

Java Developer Intern(offered as Project Engineer)

02/2022 - 04/2023

- Develop an “**e-commerce web application**” using react.js, HTML, CSS, TAILWINDS, BOOTSTRAP and Thyme Leaf for the front-end.
- Java J2EE, Spring Boot, JDBC and SQL, hibernate will be used for the back-end

### HomDoc- A Diabetes Prediction Application

[Certificate](#) | [App Download](#)

A machine learning project has been developed to detect diabetes in individuals using Python, Flutter, Smoting, XGBoosting, and random Forest Classification. By analyzing a dataset of medical records, the application identifies patterns indicative of diabetes and provides users with an accurate diagnosis through a user-friendly interface. The use of Flutter allows for easy porting to multiple mobile platforms, while the use of Smoting, XGBoosting, and Random Forest Classification enhances the application's accuracy. This project has the potential to positively impact healthcare.
